CHRISTIE®

Unsurpassed value, versatility and long-life performance

What does value mean to you? We think it's the fine balance between quality, performance, support and cost. The Christie® G Series offers you unsurpassed value – with energy saving features, low maintenance costs, numerous standard features, and the best warranty and support in the industry.

Built with proven DLP® technology, the Christie G Series gives you excellent image quality and reliability. At 6000 lumens, this is the brightest platform in its category.

Ideal for 24/7 operation, the filter-free, dust-sealed design prevents dust and dirt from affecting the projector, ensuring that image quality is preserved and maintenance costs are minimal. Shipping with standard zoom lens, the Christie G Series is packed with ProAV features, including three resolution options, built-in color matching for a more uniform image in a multi-projector configuration, and blending and warping capabilities to handle curved surfaces.

High brightness

The brightest in its class, the G Series delivers exceptional images.

Christie DWX600-G – 6150 ANSI lumens (6400 center lumens)
Christie DHD600-G – 5950 ANSI lumens (6200 center lumens)
Christie DWU600-G – 6050 ANSI lumens (6300 center lumens)

Six-segment color wheel

Comes with high-brightness color wheel for standard applications and uses.

Three resolution options

WXGA model	Amazing performance value
Native HD model	Maintain and maximize your brightness
WUXGA model	Ideal for graphic intensive applications

Color matching

When used with multiple projectors, this feature ensures accurate color matching and uniformity across the entire image.

Constant intensity mode

For tiled arrays, the constant intensity mode automatically increases brightness as the lamps wear out over time in order to maintain the overall brightness and image consistency across the display.

Dynamic Contrast

The Dynamic Contrast feature further enhances the image quality of the Christie G Series by increasing the contrast ratio to 4800:1. This series ships standard with a high-brightness, six-segment color wheel for maximum brightness and excellent color range.

Ideal for video applications, the Dynamic Contrast automatically adjusts an internal iris to extend the range of blacks and provide richer details during dark content for true image reproduction.

We understand the unique needs of your application

No application requirements are the same. We strive to pack all the features crucial to the success of your display into one compact chassis minimizing the expense of purchasing additional “out of projector” technologies. The Christie® G Series is the full package.

24/7 use capability

The G Series offers sealed, dust-free housing and heat-pipe cooling system that enables the projector to run 24 hours a day, 7 days a week in continuous operation.

360 degree projection

The Christie G Series can project from a table top, be ceiling mounted, straight down or straight up. However you spin it, the Christie G Series will fit your needs.

Christie Presenter

The Christie Presenter application allows up to four remote desktops from host PC's to be displayed on the network through Ethernet, USB, or wireless transports. It can adapt to different network settings (DHCP, fixed IP, and direct link by USB/Ethernet cable).

Wireless projection

- Easy connectivity
- Less cluttered meeting space
- Cable-free management

Projector control

- Control the projector through a web user interface
- SNMP (simple network management protocol) lets you remotely monitor a Christie projector and get status changes on various parameters

Motorized zoom, focus and lens shifts

For easy installation and configuration, the Christie G Series comes with motorized zoom, focus and lens shift to ensure your image is aligned tight within the desired viewing area for every presentation. The mechanical shutter allows for quick pauses in your display when the need arises to shutter the image.

Picture-in-picture/picture-by-picture functions offer different layout options

Blending and warping capabilities (optional)

Coupled with the internal color matching functions, blend and warp capabilities enable the projector to be used in high-end applications where large images are needed. An optional dual processor warp module is required to blend and warp displays.

Going above and beyond

We care about our customers. Your satisfaction is our ultimate goal. We stand behind our products with our second-to-none warranty and service programs.

Christie support and service

All Christie products are backed by industry-leading warranties and our renowned service. We ensure you have all the training, service and technical support you need. Christie has local technicians on five continents for international installations and global deployments.

Environmental responsibility

At Christie we recognize our responsibility to control the impact of our business on the environment. We take pride in offering eco-friendly features in our products that are not only good for the environment, but also translate to a lower total cost of ownership for our customers.
